## **ALLOWANCE**

### ***Allowable Subject Matter***

1. Claims 1-11 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Referring to claims 1-11, the primary reason for allowance of the claims is the inclusion of the step of attaching the optical components to the optical benches with a pick-and-place machine prior to the step of mechanically adjusting the relative positions of the optical components with an optical system aligner.

The closest prior art appears to be Flexible Automated Assembly of Micro-optical Elements (Optical SMD) by Wolfgang Andreasch et al. This reference discloses all the limitations of the claimed invention, except it discloses the bonding of the components after the optical alignment step. In the examiner's opinion, it would not have been obvious to one of ordinary skill in the art at the time the invention was made to reverse the order of the attachment and alignment steps.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 6,586,726 to Verdiell

U.S. Patent No. 6,376,268 to Verdiell

U.S. Patent No. 6,207,950 to Verdiell

U.S. Patent No. 6,227,724 to Verdiell

U.S. Patent No. 6,185,816 to Freund et al.

Each of these references discloses an optical production system similar to that of the claimed invention.
